

INSTALL DCE CLI

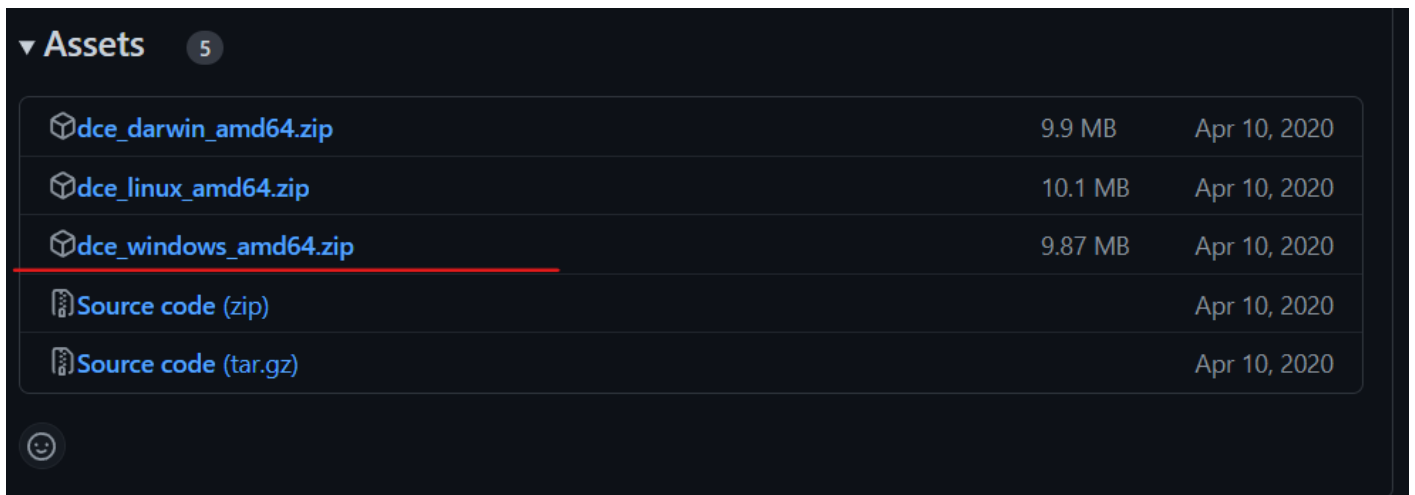

Download the appropriate executable for your OS from the latest release.

e.g. for mac, you should download dce_darwin_amd64.zip

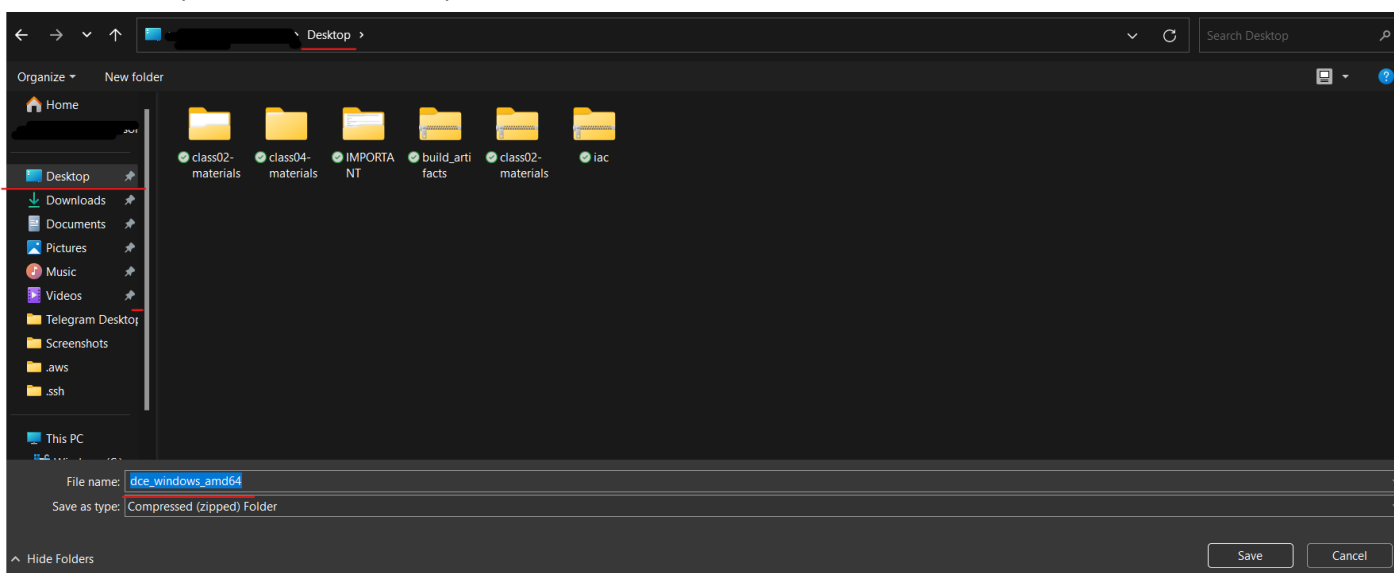

Check This Repo for Release → (<https://github.com/Optum/dce-cli/releases/tag/v0.5.0>)

- Scroll Down to Assets
- Select the right zip file eg: for windows, download dce_windows_amd64.zip
- Unzip and move the executable to a directory on your PATH, e.g. Desktop

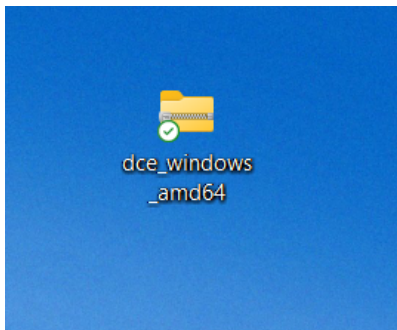

1. Select the right zip file eg: for windows, download dce_windows_amd64.zip

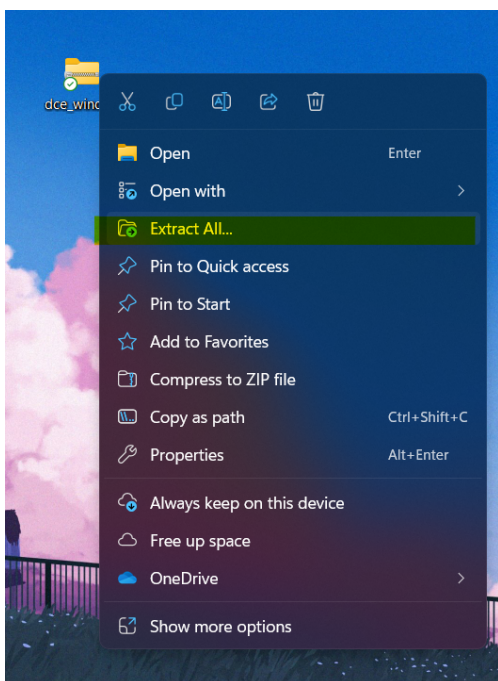

2. Download it to your folder [ie: Desktop]

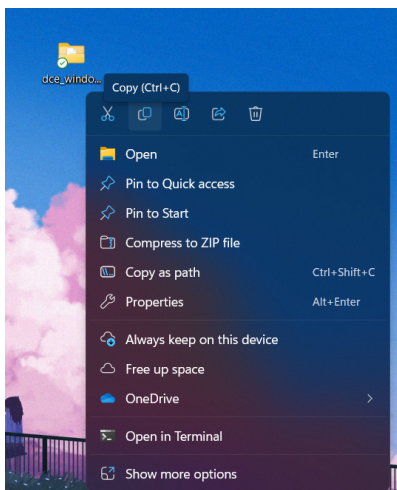

3. The zip file is now on my Desktop

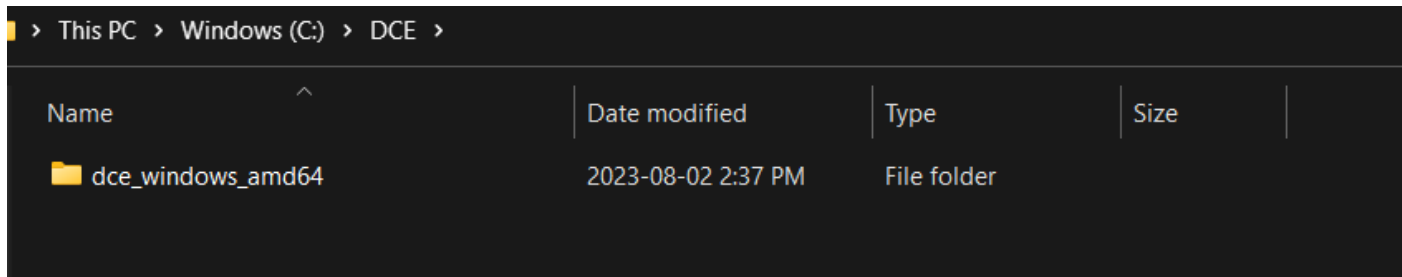

4. Unzip the zipped file [ie: Extract All]

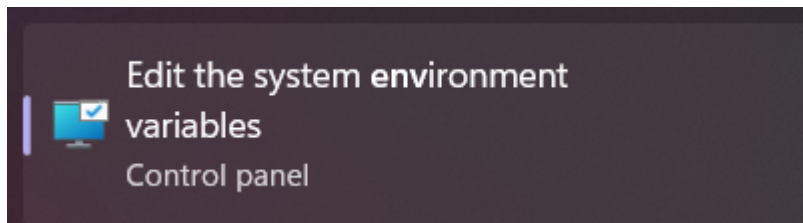

5. Copy the unzip file

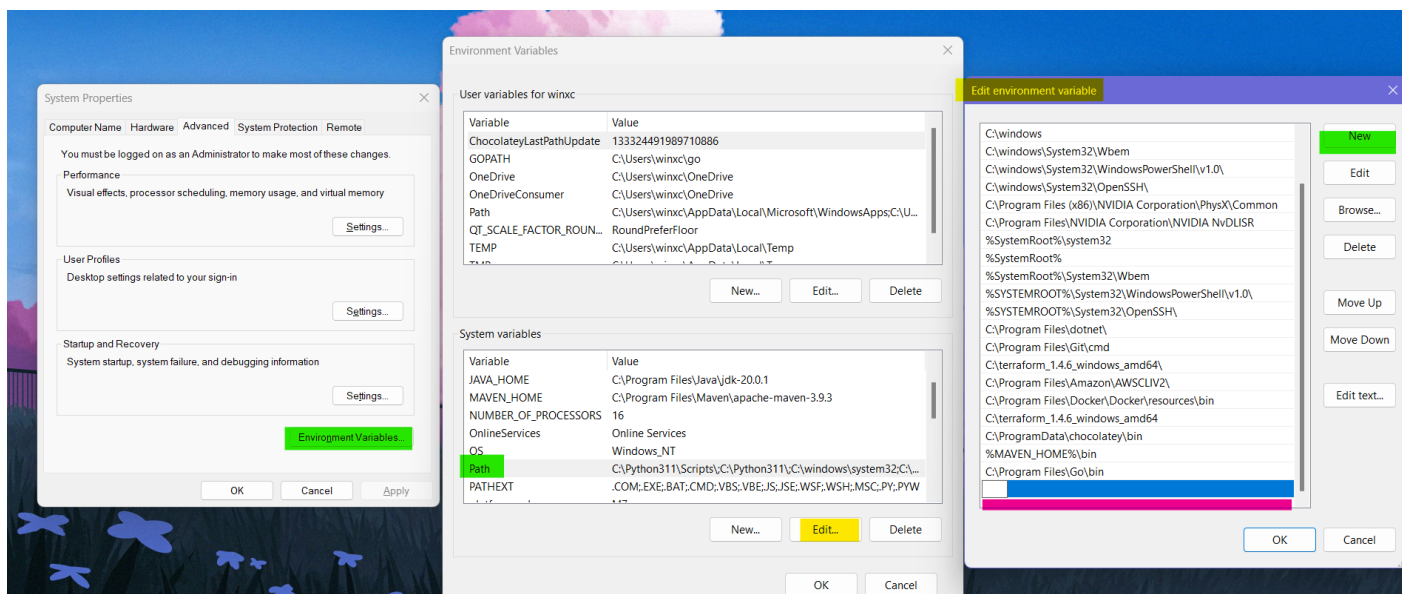

6. Create a New Folder in the C Drive called DCE and paste the unzip file then copy the PATH [ie: C:\DCE\dce_windows_amd64]

7. In the search bar, type [env] press enter for edit the system environment variables

8. System Properties → select environmental variable
- Environmental variable → System Variable [PATH] → Edit
 - In Edit env variable → Select [New] → Paste the PATH [ie: C:\DCE\dce_windows_amd64] → press [OK]

9. Perfect, Now you have the dce cli installed. You can go to your command prompt and enter[dce] and if you see a list of commands. You have successfully installed DCE on windows in your local computer

```
chia ~ (main)
$ dce
Disposable Cloud Environment (DCE)

The DCE cli allows:

- Admins to provision DCE to a master account and administer said account
- Users to lease accounts and execute commands against them

Usage:
dce [command]

Available Commands:
accounts    Manage dce accounts
auth        Login to dce
help        Help about any command
init        First time DCE cli setup. Creates config file at "$HOME/.dce/config.yaml" (by default specified by "--config")
leases      Manage dce leases
system      Deploy and configure the DCE system
usage       View lease budget information
version     View the running version of dce-cli

Flags:
  --config string    config file (default is "$HOME/.dce/config.yaml")
  -h, --help         help for dce

Use "dce [command] --help" for more information about a command.
